DETAILED ACTION

Drawings

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See the brief description of Fig. 1 and MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claim 32 is objected to because of the following informalities: there is no clear nexus between the databases, the various means (plural), the similarity search engine, and the process controller. Appropriate correction is required.

Allowable Subject Matter

3. Claims 1-39 are allowable over the prior art of record. The closest prior art of record is "SRDE – Application of Data Similarity to Process Control" by Chen et al., and US Patent Application Publication No. US 2002/0128731 A1 by Wegerich et al.

However, the prior art of record does not suggest or disclose the claimed combination of apparatus elements or method steps, most particularly: steps f(i)-(ii) of independent claims 1 and 18; the particularly claimed "similarity search engine" and "means for assigning a similarity search score to the measurement" of independent claim 32; or processing the "collected attribute information" in "language independent format" of independent claims 36 and 37.

Conclusion

4. This application is in condition for allowance except for the following formal matters:

See above.

Prosecution on the merits is closed in accordance with the practice under *Ex* parte Quayle, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter.
